Software Engineer II

Oct. 2023 - Present

- Promoted to mid-level engineer in less than two years owing to constant influence on projects, proactive skill growth, and thorough attention to detail
- Recognized as a trusted resource for frontend solutions, mentoring junior and mid-level engineers in React best practices and emerging client-side technologies, resulting in improved team efficiency and code quality
- Received praise from stakeholders and senior members for delivering a user-friendly dining reservation feature in a React Native app that emphasized accessibility, maintainability, and robustness
- Developed an AI document categorization feature utilizing retrieval augmented generation (RAG) to extract key data points, passing them to an untrained OpenAI model, and achieved around 90% accuracy contingent on document content quality

Software Engineer I

May 2022 - Oct. 2023

- Quickly transitioned from a React-focused role to tackling full-stack responsibilities with Vue.js and Laravel, taking on challenges typically handled by senior team members
- Appointed as the subject matter expert for a React Native and Laravel project in the first year of employment, serving as the primary resource for technical inquiries and client direction
- Led the refinement of the UI development process for a white-label React Native app, establishing a scalable, code-free customization framework that enabled rapid development for multiple clients

Software QA Analyst

Jan. 2021 - May 2022

- Demonstrated extensive understanding of the core product's requirements by identifying critical bugs and providing detailed evidence and context to developers, directly contributing to the timely implementation of key features and fixes and improving overall system reliability
- Spearheaded the adoption of compliance processes for FDA, HIPAA, and 21 CFR Part 11, collaborating across teams to implement standards and ensure proper compliance, leading to smooth project approvals and confidence in quality
- Mentored peers on using browser developer tools, Android Studio, and Xcode for efficient bug identification and error log collection, resulting in higher quality bug reports and an improvement in issue resolution speed

Education

San Diego State University

Aug. 2014 - May 2019

B.S. in Electrical Engineering

San Diego, CA

- Minor in Computer Science

Skills

Programming Languages

Proficient

JavaScript, TypeScript, PHP, HTML, CSS

Familiar

Python, Rust, C

Libraries, Frameworks, & Run-times

React, React Native, Vue.js, Laravel, Node.js, Express.js, FastAPI, React Query, TailwindCSS, Jest, Vitest

Third Party Platforms

Stripe, Google Maps, OpenAI

Tools & Platforms

Git, GitHub, GitHub Actions, Docker, Vite, PostgreSQL, MySQL, Figma, Jira

Other Technical Skills

Agile Methodologies, Scrum, Responsive Design, Accessibility, RESTful APIs

Certifications

Certified Scrum Developer (CSD)

Badge ID: 1702381 [↗](#)

Scrum Alliance

Dec. 2022 - Aug. 2026

Certified Scrum Master (A-CSM)

Badge ID: 1987352 [↗](#)

Scrum Alliance

Aug. 2024 - Aug. 2026

Interests

Electronic music, kickball, video games, cats, yoga
